TECHNOLOGY

Physicians have access to the latest technology, which enables you to securely and safely access your patient information and testing results electronically from your office or home.

- Electronic Medical Record System for quicker access to patients records and testing results.
- PACS System: Digitally archives radiology images providing electronic retrieval of images and results.
- Cardiology PACS System: Digitally archives echo and cardiac cath lab procedures providing electronic retrieval of images and results.

PHYSICAL THERAPY

Whether an ailment is a result of sports, work, an accident or a side effect of surgery, the Adventist Plainfield Imaging & Outpatient Center offers a personalized schedule of care. Our licensed therapists will perform a one-on-one evaluation to assess specific patient needs and work together towards a successful outcome. Our goals are to manage pain, increase strength and postural awareness, teach prevention and, most importantly, help patients return to normal activities quickly and safely.

To schedule a physical therapy appointment call 630.312.3300.

IMAGING & OUTPATIENT SERVICES

The Adventist Plainfield Imaging & Outpatient Center

 **Adventist**
Plainfield Imaging & Outpatient Center
A Division of Adventist Bolingbrook Hospital

At Adventist Plainfield Imaging & Outpatient Center, we realize that your patients' comfort and peace of mind is your top priority. Of course, you also want them to receive top quality medical care. That's why we offer an array of advanced, high-level imaging tests as well as a full-range of physical therapy services. And we do it all in a warm, welcoming setting, located just minutes from many of your patients.

HIGH-FIELD OPEN MRI: For years, medical professionals have struggled with low-quality images produced by open MRIs. Many patients dislike the physical confines and claustrophobic effects of a closed MRI. It has always been a compromising situation—*until now*.

As the first High-Field Open MRI in the Adventist Midwest Health Region, we can provide high-field performance while putting patients completely at ease—and positioning your practice as truly dedicated to both patient health and comfort. The Philips Panorama 1.0T MRI system. High-field and open. The no-compromise solution for neuro, angio, orthopedic, body, cardiovascular and pediatric MRI imaging.

At Adventist Plainfield Imaging & Outpatient Center, your patients will experience greater personal comfort, and you'll benefit from this high-field performance. The Philips Panorama 1.0T open MR top quality imaging system uses a vertical magnet, which allows for a wide patient gap—the largest in the industry—160 cm by 45 cm. The increased space helps all patients to relax a bit more, especially your pediatric, obese, elderly, frail, and claustrophobic patients.

Additionally, the Philips Panorama 1.0T achieves a nearly 360-degree viewing angle in the vertical plane. Also, vertical field RF coils are 40% more efficient than RF coils in a cylindrical magnet. The result is 1.5T-like image quality in a truly open system. It's comfort without sacrificing quality. Now we can meet *you and your patient's* needs.

ULTRASOUND: See what's happening inside your patients in real time to diagnose and recommend treatment for a number of medical conditions.

CT SCAN: Our 16 slice CT delivers highly detailed results in record time over a scan-range doing away with the need for re-positioning and largely reduces examination time for patients. It gives you the choice of reducing dose without loss of image quality or image quality improvement at common low dose settings.

DEXA SCAN:

DEXA Scan only takes a few minutes and it is painless. It's an essential test for diagnosing osteoporosis

DIGITAL X-RAY & MAMMOGRAPHY:

Our digital mammography uses less radiation than film and the images have extremely high contrast, so they are very detailed. And because they're on a computer this helps physicians to make accurate diagnoses, the images can be altered and magnified, and the radiologist can quickly pull up other images and compare them. The benefits of digital mammography also include faster image acquisition, shorter exam times, easier image storage, and ability to transmit images over a network.

WE'RE READY TO CARE FOR YOUR PATIENTS

Whenever your patients are in need of imaging services, trust the Adventist Plainfield Imaging & Outpatient Center to take good care of them, just like you do. Our advanced imaging and individualized physical therapy services are centered on accurate diagnostic results and responsive patient care.

To schedule an appointment, please call 630.856.7070. Same day appointments are available. For hours of operation, visit us at www.keepingyouwell.com/abh.
